# Product categories

## Essential oils

More than 30 essential oil products available. Many of them offered in organic certified variety as well. All essential oil products are 100% pure and natural produced following the best practices and with Bulgarian origin.

## Concretes and absolutes

We supply more than 10 concretes and absolutes. Produced using hexane extraction, concretes and absolutes are preferred by perfumers for their preserved characteristic smell.

## Floral waters (Hydrosols)

Over 20 different hydrosols produced using steam distillation of the fresh plant material. All floral waters are double filtered and disinfected using UV light technology to ensure all bacteria and microorganism are removed from the product and there are stable.

In our portfolio of customers, we have all different types of companies, which helps us understand your needs and deliver the right products and services to you. Get in touch and let us know more about your business so we can discuss your needs and how we can collaborate.

# Testimonials

I visited ATMOSPHER Ltd for the first time in 2019. They showed me around the company, introduced to the team, and took me to their rose field as well as distillation place, which was absolutely warm-welcoming and great experience. Since then, our collaboration has started. The team is always very supportive and effective. They always kindly share with us the market updates and other information. We can definitely count on them!

**Kiyoshi Miyazaki**  
Managing Director  
Miyako-Nios Ltd, Japan

It has been a pleasure working with Bulgarian company Atmosphaer from whom we bought the purest lavender oil that we are using in our perfume formulations. Romina is the company star member who is having a deep technical knowledge about her products. We wish the best for them.

**Gaurav Mittal**  
Managing Director  
Aromatic And Allied Chemicals

# Certifications

**GMP (Good Manufacturing Practices) certification**
